Proper Education about Teen Pregnancy

As a student in High School teaching this topic would be good for all Teens in general. I care for every Teen in my school and out of school. The choices that they make in life will reflect on themselves. Even having sexual intercourse with their spouse. It is important for Teens to realize the choice they are making when it comes to having sex because one small little mistake can change your life forever. And for me teaching/sharing about this topic will hopefully give the Teens to think wisely about the choice of having sexual intercourse with their spouse. Education
